FICTIONAL TRAINING DOCUMENT - NO REAL BORROWER DATA

Tonle Harvest solar project - version 1

Project scope: Construction and operation of a solar photovoltaic (PV) electricity generation system.

The financed component is solar PV electricity generation for an irrigation pump.

The farming operation is separate from the financed solar component.

Technology: Solar photovoltaic panels, inverter and electrical controls.

Equipment capacity: 30 kWp. Electricity is used on site.

This proposal is synthetic. No permits, impacts or eligibility are verified.

FICTIONAL TRAINING DOCUMENT - SUPPLIER AND RISK NOTES

A fictional supplier quote covers panels, inverter, mounting and installation.

The proposal has no attached engineering drawings or signed supply contract.

Land ownership and water withdrawal permissions: evidence needed.

Climate hazards, waste management and worker safety: review needed.

No bank investment policy has been provided.
